

Quality Policy

In Tschudi we are committed to providing products and services meeting or exceeding customer expectations. Employees are encouraged to be proactive when meeting the customer and we aim for 100% customer satisfaction and sustainability in customer relations.

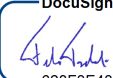

Our value priority is clear: People, life, health and the environment shall have priority over other values.

The ultimate ambition is zero defects and waste, and we strive towards this by promoting a quality culture based on management by objectives and involvement of employees in implementation and continuous improvement of reliable and efficient business processes and the quality management system.

We regularly monitor the internal and external context of the organization, aiming to understand the needs and expectations of all interested parties, and to understand and control relevant risks and opportunities. We consistently provide products and services in compliance with applicable statutory and regulatory requirements, as well as the specific customer and/or internal requirements.

Our corporate Vision, Core values and Policies provide direction and ambition for the Tschudi group companies and for the quality management system. Furthermore, it provides a framework for defining company strategies and objectives, for development of plans and standards, for measuring progress and for the establishment and implementation of the integrated Tschudi Management System (TMS).

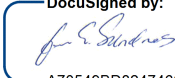

The group companies shall be compliant with the ISO 9001:2015 Quality Management Systems standard.
